JALARAM METALS

Key Operating Machines

Automatic Bar Turning Trobe Type Lathe Machines Multi Station Rotary Disc Transfer Indexing Machines for Secondary Operation

Specialist

Precision Turned & Machined Components
Exclusively in Brass & Other related Copper Alloys

Industries Served

Electrical Distributions Equipments, Automobiles, Tele Communications, Sanitary Fittings, Utility Meters, Computers and Peripherals, Engineering Plastic Components, Fiber Optic Equipments, Electronic Circuit Hardware

Experience 45 years in Quality Brass Machined Components Business

Processing Material

Brass & Special Copper Alloy Such as BS 2874 CZ 121, UNS 36000, BS 249

Machining Facility

Brass Bar Turning & Machining on Automatic Lathe
Brass Forging plus Brass Casting

Processing Expertise in

Brass Screw Machining & Turned Engineering Component
Specialized Turned Fasteners
Brass Threaded & Knurled Inserts
Brass Wire Terminals & Connectors
Lighting & Earthing Protection Parts, Cable Gland Systems

CAD Software AutoCAD 3D, 3D Max Studio

Processing Range 3 mm to 75 mm Diameter

Annual Processing Capacity 1200 Metric Tons

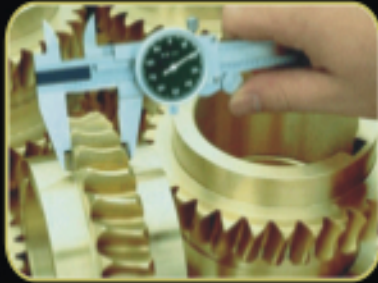

Why we ?

- Premium Grade Quality
- Timely And Safe Delivery
- Competitive Prices
- Strong Infrastructure
- Team of Industry Experts at the Helm of Affairs

JALARAM METALS

Quality Control

Jalaram Metals has manufacturing activity of its products in the hub (brass) city called "Jamnagar" in India. It has mass production capacity quality-wise, runs for its products as per the design and specifications given by customers. Jalaram Metals manufacture products, which are widely acceptable all over the world considering global standards and specifications of its end products. It has its own Research and Development department in side the compound so that it fully co-operates with manufacturing department to produce quality products and new innovation.

Focus on our customers : Our organization understand customer's needs and requirements and thrive to be at there level of expectations.

Involvement of our employee : We encourage the involvement of people at all levels and help them to develop and use their abilities.

Take a system approach : Our organization is more efficient and effective because we use a system approach to identify interrelated process and treat them as a system.

Encourage continuous improvement : Our organization continually tries to improve and take a permanent commitment to continually improve overall performance.

Get the fact before we decide : Organizations perform better when their decisions are based on fact. Therefore, our base is on decisions on the analysis of factual improvement and data.

Work with suppliers : Organizations depend on their suppliers to help them create value hence we maintain a mutually beneficial relationship with our suppliers.
